

SBU™

SELF-BALANCING UNICYCLE

BALANCED

- The advanced angle sensing electronics and software combined with a powerful electric motor allow the SBU to self-balance and “pedal” for you. Just lean forward to go, lean back to stop.

STRONG AND PORTABLE

- Weighs only 24lbs. Carry it up stairs. Bring it on a bus, train, car or elevator. Built-in front/rear scuff guards and handle.

ECONOMIC AND GREEN

- Zero emissions. 2¢ per electrical charge. Virtually silent. Maintained by local bike shop.

HIGH TECH

- First and only electric self-balancing unicycle on the market. Latest technology custom lithium-ion nano-phosphate (LiFePO4) battery pack. Battery is rated for more than 1000 cycles.

SAFE

- Automatic fall detection shutoff. Safety lanyard/switch. Rider is in upright position. Very maneuverable. Great in crowds. Average learning time is 1 hour.

OPTIONAL ACCESSORIES

- Extra/Replacement 36V Battery
- Extra/Replacement Fast Charger

USERS

- Public transportation riders
- College students
- Car-less urban residents
- Truck drivers
- Pilots/Boaters/Campers
- Tourists
- Unicycle trainees

USES

- Urban commuting
- Use seamlessly with public transportation
- Save on parking/fuel
- Avoid traffic
- Ultra portable
- Rentals
- Cool new toy
- Unicycle training aid
- Performance act
